Move fast, even in big codebases

We're living in the world of Big Code: massive and ever-growing codebases and repositories, multiple languages and file formats, and a wide variety of developer tools. With this increased complexity, it’s no wonder that software development organizations struggle to improve the developer experience, accelerate development velocity, and effectively reduce security risks.

BIG CODE PAINS*

<table>
<thead>
<tr>
<th>Percentage</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>75%</td>
<td>75% of engineering managers say their teams avoid updating code because of fear of breaking dependencies.</td>
</tr>
<tr>
<td>92%</td>
<td>92% of developers say there's more pressure to release code faster.</td>
</tr>
<tr>
<td>99%</td>
<td>99% of developers say they would benefit from additional code search capabilities.</td>
</tr>
</tbody>
</table>

*Dimensional Research, Aug. 2020

You need to... | With Sourcegraph you can...
---|---
Onboard everyone faster | Facilitate faster learning of new and unfamiliar code—for both new hires and current teammates—with enhanced code intelligence and shareable links to specific code.
Boost development velocity | Improve developer productivity and experience by enabling developers to stay in flow and find answers quickly.
Find and fix security problems in hours, not days | Identify incident root causes with confidence, improve production stability, and reduce the time to recovery.
Catch more bugs with better code reviews | Combine code intelligence with live data pulled from external services so code reviews are fast and thorough.
 Automate large-scale code changes | Rapidly and securely remove legacy code, fix critical security issues, pay down tech debt, and make large-scale code changes and refactors across the entire codebase.

Engineering teams at the world's most innovative companies use Sourcegraph's universal code search to search, understand, and automate changes across large codebases.

SoFi

“Sourcegraph is an ingrained part of my daily process at SoFi. With Sourcegraph, our engineers can understand all of the repercussions of committing a change to a service that is exposed to other services.”
Ursula Robertson | Engineering Manager

yelp

“Sourcegraph empowers developers at Yelp to ship code faster and more reliably than ever before.”
Kevin Chen | Software Engineer

indeed

“The ability to automate downstream changes that Sourcegraph Batch Changes provides is a key capability for reducing the hidden burden of updates pushed across teams and enabling us to increase our engineering velocity.”
Jared Hodge | Sr. Manager Developer Experience

lyft

“Sourcegraph makes it easy to survey and understand existing use cases to make sure we build the right thing.”
Aneesh Agrawal | Software Engineer
