

Move fast, even in big codebases

We're living in the world of Big Code: massive and ever-growing codebases and repositories, multiple languages and file formats, and a wide variety of developer tools. With this increased complexity, it's no wonder that software development organizations struggle to deliver secure, high-quality software on time.

Big Code pains*

75%

of engineering managers say their teams avoid updating code because of fear of breaking dependencies.

92%

of developers say there's more pressure to release code faster.

99%

of developers say they would benefit from additional capabilities for searching code.

Sourcegraph is the only enterprise product that solves Big Code problems

You need to...

You can with Sourcegraph!

Onboard everyone faster

Facilitate faster learning of new and unfamiliar code—for both new hires and current teammates—with enhanced code intelligence and shareable links to specific code.

Boost developer productivity

Improve productivity by enabling developers to **stay in flow and find answers quickly**.

Find security problems in hours, not days

Identify incident root causes with confidence, improve production stability, and **reduce the time to recovery**.

Catch more bugs with better code reviews

Combine code intelligence with live data pulled from external services so **code reviews are fast and thorough**.

Automatically fix things quickly and safely

Run campaigns to rapidly and securely remove legacy code, fix critical security issues, pay down tech debt, and **make large-scale code changes and refactor across the entire codebase**.

* Dimensional Research, Aug. 2020

Engineering teams at the world's most innovative companies use Sourcegraph's universal code search to find, understand, and fix code in large codebases.

"Sourcegraph empowers developers at Yelp to ship code faster and more reliably than ever before."
Kevin Chen | Software Engineer

"Seriously, Sourcegraph is the best tool we've invested in. It's made me insanely more productive and efficient at writing code here."
Lyft Engineering Manager

"Sourcegraph is a must use tool when navigating unfamiliar codebases. Can't believe I once used GitHub's code navigation to do this."
Veeral Patel | Software Engineer

"Saved searches allow us to constantly monitor code that manages personal data, organization wide, before changes land in production."
Simon Law | Software Engineer

Big Code requires powerful developer tools. Move fast with Sourcegraph.
